

Atlanta Medical Center

A Culture Of CaringSM

LIVE A HEALTHIER LIFE FOR YOU
AND YOUR FAMILY

SURGERY CAN MEAN MORE THAN JUST LOSING WEIGHT, it can help resolve or improve some of the health conditions associated with obesity, such as diabetes, hypertension (high blood pressure), sleep apnea, joint pain and incontinence.

Obesity is a disease that can't be managed alone. At Atlanta Medical Center, we've performed more than 5,000 weight loss surgeries. And after surgery, we provide follow up, support groups, nutritional counseling and healthy cooking classes. **We help you transform your life.**

SURGERY

HAVE YOU STRUGGLED WITH WEIGHT LOSS LONG ENOUGH? Our surgical team routinely performs gastric bypass, adjustable gastric banding, gastric sleeve and duodenal switch procedures. We primarily use the laparoscopic technique, depending on the patient's individual needs. Weight loss surgery is designed for those with a body mass index equal to or greater than 40, or equal to or greater than 35 with serious medical conditions.

SEMINARS

FREE SEMINARS AT FOUR CONVENIENT LOCATIONS. Attend one of our free seminars to find out if surgery is an option for you. One of our surgeons will explain the process and answer any questions you may have. You can browse our locations and times below. Sign up for a seminar in the form above.
