CONSIDERING SURGERY WITHOUT A BLOOD TRANSFUSION?

THE BLOODLESS MEDICINE AND SURGERY PROGRAM of Atlanta Medical Center offers a full range of bloodless surgical procedures and medical treatments using the latest in blood conservation techniques for patients who wish to avoid blood transfusions. Research has shown that by choosing blood conservation methods such as bloodless surgery, patients may decrease the risk of infection and have a shorter hospital stay.

WHAT IS IT?

"BLOODLESS" MEANS medical or surgical treatment without the use of banked (stored) allogenic blood or primary blood components. Blood loss often occurs during surgery. A bloodless program endeavors to minimize blood loss by utilizing special blood conservation methods. Serving the Southeast with a blood conservation program that provides quality care with a knowledgeable staff of medical professionals, we are part of a network of hospitals nationwide committed to providing medical and surgical alternatives to patients who seek bloodless medicine.

WHAT ARE THE BENEFITS?

ATLANTA MEDICAL CENTER provides a full-time coordinator to assist patients and their families throughout the consultation, admission and procedure process.

By choosing blood conservation methods, such as bloodless surgery, patients may:

- Decrease the risk of infection
- Decrease the risk of blood-borne diseases and viruses
- Avoid allergic reactions and complications
- Spend fewer days in the hospital
- Reduce medical costs
