## TOTAL JOINT REPLACEMENT

**TOTAL JOINT REPLACEMENT** is an option for someone who suffers from chronic joint pain caused by arthritis or progressive joint pain as the result of a previous sports or traumatic injury. The board certified orthopedic surgeons at Atlanta Medical Center are specially trained to evaluate and treat hip, knee and shoulder problems. Their goal is to help relieve your pain, restore your mobility and enhance your freedom of movement.

## MAKOPLASTY®

**ATLANTA MEDICAL CENTER OFFERS MAKOPLASTY®**, a specific partial knee and total hip procedure that involves a robotic arm-assisted surgical procedure designed to relieve the pain caused by joint degeneration due to osteoarthritis. At Atlanta Medical Center, MAKOplasty® is currently being used to treat the damaged part of the knee, while sparing the surrounding healthy bone and ligaments.
